PROFESSIONAL EXPERIENCE

2021 Jan – present
Tunis, Tunisia

Frontend Developer, *Apprentus*

- Led the development of innovative user-focused features, significantly boosting user engagement and satisfaction through detailed analysis of user behavior.
- Built a repository of reusable codes and libraries, enhancing future development, improving code quality, and streamlining workflow.
- Played a key role in technical validation of UI/UX designs, ensuring they were viable, aesthetically pleasing, and functional, thus maintaining a high-quality user experience.
- Optimized application performance for improved speed and scalability, resulting in a superior user experience that exceeded expectations.
- Addressed cross-browser compatibility issues, ensuring a consistent user experience across platforms and retaining a diverse user base.
- Focused on SEO principles, improving the application's online visibility, search engine rankings, and significantly increasing website traffic.

2019 Dec – 2021 Jan
Tunis, Tunisia

Fullstack Developer, *Independant Freelancer*

- Led numerous projects with a diverse range of clients, significantly contributing to each, including the development of a Booking Plugin System using Stencil.js to streamline appointment booking processes.
- Designed the system to integrate seamlessly into any website via a Javascript script tag, enhancing the user experience through a straightforward booking journey:
 - Starts with a discreet icon on the site.
 - Icon click reveals a pop-up with a list of services.
 - Users select services and proceed to pick times, displayed through a calendar view.

- Ajax is utilized for dynamic presentation of available slots, allowing users to choose suitable times.
- Final step involves users confirming their booking details and entering personal information.
- Actively performed troubleshooting and enhancements on WordPress websites, handling tasks from minor bug fixes to major performance improvements using HTML, CSS, and PHP to boost site functionality and user experience.

2017 Jun – 2019 Nov
Monastir, Tunisia

Functional ERP Administrator, *LE SOIE S.A.R.L.*

- Took a proactive role in the seamless integration of innovative features into the ERP system, leveraging a wide range of APIs with proficiency. This strategic involvement not only markedly improved the system's functionality but also dramatically elevated the overall user experience.
- Led the charge in devising and compiling detailed documentation that thoroughly explained the usage and advantages of the recent additions to the system. This initiative played a critical role in ensuring users could easily adapt to the changes, promoting a more fluid transition and enhancing user satisfaction.
